7 Some Advice

- Apart from my consultation hours, we will also have student tutors available for academic assistance. I highly encourage you to visit both me and the student tutors regularly, as this will help to ensure a robust preparation.
- I would highly recommend that you take lecture notes for each class and skim through them daily. This will help you to maximize your preparation before exams.

Lastly, I believe we can achieve many things if we stay consistent and put in enough hard work. All the best!
